

TECHNICAL SKILLS

DATA & ANALYTICS

Data Analysis, Power BI, Tableau, Excel, MATLAB

LANGUAGES & CORE

Java, SQL, Python, Data Structures & Algorithms

WEB ECOSYSTEM

HTML5, CSS3, JavaScript

CLOUD SYSTEMS

AWS (EC2, S3, VPC, DynamoDB, CloudWatch)

DATABASES & IDES

MySQL, MongoDB, Git, VS Code

ENTERPRISE & DESIGN

Salesforce Basics, UI/UX (Figma, Canva), Industrial IoT

CERTIFICATIONS

Data Analysis Simulation

Forage (Deloitte)

Deep Learning

IIT Ropar

Marketing Analysis II

IIT Kanpur

Industrial IoT: Security

Deloitte

MATLAB Onramp

MathWorks

LANGUAGES

- English (Bilingual)
- Hindi (Native)

INTERESTS

- Web application development
- Exploring emerging technologies
- Continuous skill development

EDUCATION

Vellore Institute of Technology (VIT), Bhopal

B.Tech in CSE (Specialization: E-Commerce Technology) | **CGPA: 8.62/10**

Expected Graduation: 2027

Shining Public School — HSC (Class XII) • **84.2%**

St. Francis Convent School — Matriculation (Class X) • **87.0%**

PERSONAL PROJECTS

Hardware Shop Repair & Paint Estimator

Stack: React.js, Node.js, Express, MongoDB, JWT, Cloud Atlas

- Engineered a full-stack e-commerce architecture featuring automated cost estimation algorithms, improving math calculation speed and user session accuracy by 98%.
- Configured secure routing guards and user authentication infrastructure using JSON Web Tokens (JWT) to safely handle concurrent sessions.
- Hosted application layers across Vercel and API backend routing workflows on Render, achieving a 25% reduction in page layout render constraints.

Seven Wonders E-Commerce Platform

Stack: HTML5, CSS3, JavaScript, React, PHP, MySQL Database

Architected a custom full-stack merchandising marketplace optimized for secure product distribution and catalog search operations.

- Constructed relational database models with MySQL to control dynamic stock levels, optimizing complex index queries to scale efficiently for 1,000+ simulated user sessions.

INDUSTRIAL EXPOSURE & TRAINING

Cloud Infrastructure & Networking Track

I Medita, Pune • *Specialized Engineering Trainee*

Acquired deep domain training regarding AWS deployment infrastructure, routing protocols, secure virtual machine execution, and subnets.

- Designed enterprise network distribution topologies inside Cisco Packet Tracer, resolving performance constraints by structuring isolated subnets.
- Completed an entrepreneurship sprint run by Milind Datar (CaneBOT) assessing dynamic modern scale-up frameworks and commercial distribution models.

Industrial Site Visits & Corporate Ecosystems

T-Hub, T-Works, L&T Metro, BSNL • Hyderabad Hubs

- Evaluated dynamic business incubator workspaces at T-Hub and prototype lifecycle engineering environments inside T-Works labs.
- Observed enterprise distribution operations including main telecom routing trunks at BSNL and operational central control pipelines at L&T Metro.
